	Remarks:							Action Taken:
	DR-2 exceeded 10% over background, taken in the plume.			Re-test DR-2R1 was taken.				
DR-4 exceeded 10% over background, taken in the plume.			Re-test DR-4R1 was taken.					
DR-3 exceeded 10% over background, taken out of the plume, on port side.			Re-test DR-3R1 was taken.					
DR-3 taken out of order to ensure completion of test prior to end of load.			The dredge moved away from the area while continuing dredging to avoid further increasing the turbidity at the location where the exceedence was measured. The dredge coordinates were marked on the GPS screen to insure no further dredging occurred at the location where the exceedence was measured.
